Preface to the Student xxiii

0 *The Real Numbers* 1

0.1 The Real Line 2

Construction of the Real Line 2

Is Every Real Number Rational? 3

Problems 6

0.2 Algebra of the Real Numbers 7

Commutativity and Associativity 7

The Order of Algebraic Operations 8

The Distributive Property 10

Additive Inverses and Subtraction 11

Multiplicative Inverses and Division 12

Exercises, Problems, and Worked-out Solutions 14

0.3 Inequalities 18

Positive and Negative Numbers 18

Lesser and Greater 19

Intervals 21

Absolute Value 24

Exercises, Problems, and Worked-out Solutions 26

Chapter Summary and Chapter Review Questions 32

1	<i>Functions and Their Graphs</i>	33
1.1	Functions	34
	Definition and Examples	34
	Equality of Functions	36
	The Domain of a Function	37
	Functions via Tables	38
	The Range of a Function	38
	Exercises, Problems, and Worked-out Solutions	41
1.2	The Coordinate Plane and Graphs	47
	The Coordinate Plane	47
	The Graph of a Function	49
	Determining a Function from Its Graph	51
	Which Sets Are Graphs of Functions?	53
	Determining the Range of a Function from Its Graph	53
	Exercises, Problems, and Worked-out Solutions	54
1.3	Function Transformations and Graphs	62
	Shifting a Graph Up or Down	62
	Shifting a Graph Right or Left	63
	Stretching a Graph Vertically or Horizontally	65
	Reflecting a Graph in the Horizontal or Vertical Axis	67
	Even and Odd Functions	69
	Exercises, Problems, and Worked-out Solutions	71
1.4	Composition of Functions	81
	Definition of Composition	81
	Order Matters in Composition	82
	Decomposing Functions	83
	Composing More than Two Functions	84
	Exercises, Problems, and Worked-out Solutions	85
1.5	Inverse Functions	90
	The Inverse Problem	90
	One-to-one Functions	91
	The Definition of an Inverse Function	92
	The Domain and Range of an Inverse Function	94
	The Composition of a Function and Its Inverse	95
	Comments about Notation	97
	Exercises, Problems, and Worked-out Solutions	98

1.6 A Graphical Approach to Inverse Functions	104
The Graph of an Inverse Function	104
Inverse Functions via Tables	106
Graphical Interpretation of One-to-One	106
Increasing and Decreasing Functions	108
Exercises, Problems, and Worked-out Solutions	110
Chapter Summary and Chapter Review Questions	115

2 *Linear, Quadratic, Polynomial, and Rational Functions* 117

2.1 Linear Functions and Lines	118
Slope	118
The Equation of a Line	119
Parallel Lines	122
Perpendicular Lines	124
Exercises, Problems, and Worked-out Solutions	127
2.2 Quadratic Functions and Parabolas	134
The Vertex of a Parabola	134
Completing the Square	136
The Quadratic Formula	139
Exercises, Problems, and Worked-out Solutions	141
2.3 Integer Exponents	147
Exponentiation by Positive Integers	147
Properties of Exponentiation	148
Defining x^0	149
Exponentiation by Negative Integers	150
Manipulations with Powers	151
Exercises, Problems, and Worked-out Solutions	153
2.4 Polynomials	159
The Degree of a Polynomial	159
The Algebra of Polynomials	160
Zeros and Factorization of Polynomials	162
The Behavior of a Polynomial Near $\pm\infty$	165
Graphs of Polynomials	168
Exercises, Problems, and Worked-out Solutions	170

2.5	Rational Functions	175
	Ratios of Polynomials	175
	The Algebra of Rational Functions	176
	Division of Polynomials	177
	The Behavior of a Rational Function Near $\pm\infty$	180
	Graphs of Rational Functions	183
	Exercises, Problems, and Worked-out Solutions	184
2.6	Complex Numbers*	190
	The Complex Number System	190
	Arithmetic with Complex Numbers	191
	Complex Conjugates and Division of Complex Numbers	192
	Zeros and Factorization of Polynomials, Revisited	195
	Exercises, Problems, and Worked-out Solutions	198
2.7	Systems of Equations and Matrices*	203
	Solving a System of Equations	203
	Systems of Linear Equations	205
	Matrices and Linear Equations	209
	Exercises, Problems, and Worked-out Solutions	216
	Chapter Summary and Chapter Review Questions	222
3	<i>Exponents and Logarithms</i>	224
3.1	Rational and Real Exponents	225
	Roots	225
	Rational Exponents	228
	Real Exponents	230
	Exercises, Problems, and Worked-out Solutions	232
3.2	Logarithms as Inverses of Exponentiation	238
	Logarithms Base 2	238
	Logarithms with Arbitrary Base	239
	Change of Base	241
	Exercises, Problems, and Worked-out Solutions	243
3.3	Algebraic Properties of Logarithms	248
	Logarithm of a Product	248
	Logarithm of a Quotient	249

*Section can be skipped if focusing only on material needed for first-semester calculus.

Common Logarithms and the Number of Digits	250
Logarithm of a Power	251
Exercises, Problems, and Worked-out Solutions	252
3.4 Exponential Growth	259
Functions with Exponential Growth	260
Population Growth	262
Compound Interest	264
Exercises, Problems, and Worked-out Solutions	269
3.5 Additional Applications of Exponents and Logarithms	275
Radioactive Decay and Half-Life	275
Earthquakes and the Richter Scale	277
Sound Intensity and Decibels	279
Star Brightness and Apparent Magnitude	280
Exercises, Problems, and Worked-out Solutions	282
Chapter Summary and Chapter Review Questions	288
4 Area, e, and the Natural Logarithm	290
4.1 Distance, Length, and Circles	291
Distance between Two Points	291
Midpoints	292
Distance between a Point and a Line	293
Circles	294
Length	296
Exercises, Problems, and Worked-out Solutions	298
4.2 Areas of Simple Regions	304
Squares	304
Rectangles	305
Parallelograms	305
Triangles	305
Trapezoids	306
Stretching	307
Circles	308
Ellipses	310
Exercises, Problems, and Worked-out Solutions	313
4.3 e and the Natural Logarithm	321
Estimating Area Using Rectangles	321

Defining e	323
Defining the Natural Logarithm	326
Properties of the Exponential Function and \ln	327
Exercises, Problems, and Worked-out Solutions	329
4.4 Approximations with e and \ln	336
Approximation of the Natural Logarithm	336
Inequalities with the Natural Logarithm	337
Approximations with the Exponential Function	338
An Area Formula	339
Exercises, Problems, and Worked-out Solutions	342
4.5 Exponential Growth Revisited	346
Continuously Compounded Interest	346
Continuous Growth Rates	347
Doubling Your Money	348
Exercises, Problems, and Worked-out Solutions	350
Chapter Summary and Chapter Review Questions	355
5 <i>Trigonometric Functions</i>	357
5.1 The Unit Circle	358
The Equation of the Unit Circle	358
Angles in the Unit Circle	359
Negative Angles	361
Angles Greater Than 360°	362
Length of a Circular Arc	363
Special Points on the Unit Circle	364
Exercises, Problems, and Worked-out Solutions	365
5.2 Radians	371
A Natural Unit of Measurement for Angles	371
Negative Angles	374
Angles Greater Than 2π	375
Length of a Circular Arc	376
Area of a Slice	376
Special Points on the Unit Circle	377
Exercises, Problems, and Worked-out Solutions	378
5.3 Cosine and Sine	383
Definition of Cosine and Sine	383

Cosine and Sine of Special Angles	385
The Signs of Cosine and Sine	386
The Key Equation Connecting Cosine and Sine	388
The Graphs of Cosine and Sine	389
Exercises, Problems, and Worked-out Solutions	391
5.4 More Trigonometric Functions	396
Definition of Tangent	396
Tangent of Special Angles	397
The Sign of Tangent	398
Connections between Cosine, Sine, and Tangent	399
The Graph of Tangent	399
Three More Trigonometric Functions	401
Exercises, Problems, and Worked-out Solutions	402
5.5 Trigonometry in Right Triangles	408
Trigonometric Functions via Right Triangles	408
Two Sides of a Right Triangle	410
One Side and One Angle of a Right Triangle	411
Exercises, Problems, and Worked-out Solutions	412
5.6 Trigonometric Identities	417
The Relationship Between Cosine and Sine	417
Trigonometric Identities for the Negative of an Angle	419
Trigonometric Identities with $\frac{\pi}{2}$	420
Trigonometric Identities Involving a Multiple of π	422
Exercises, Problems, and Worked-out Solutions	426
5.7 Inverse Trigonometric Functions	431
The Arccosine Function	431
The Arcsine Function	434
The Arctangent Function	436
Exercises, Problems, and Worked-out Solutions	439
5.8 Inverse Trigonometric Identities	442
The Arccosine, Arcsine, and Arctangent of $-t$: Graphical Approach	442
The Arccosine, Arcsine, and Arctangent of $-t$: Algebraic Approach	444
Arccosine Plus Arcsine	445
The Arctangent of $\frac{1}{t}$	445
Composition of Trigonometric Functions and Their Inverses	446

More Compositions with Inverse Trigonometric Functions **447**
Exercises, Problems, and Worked-out Solutions **450**

Chapter Summary and Chapter Review Questions **454**

6 Applications of Trigonometry 456

6.1 Using Trigonometry to Compute Area 457

The Area of a Triangle via Trigonometry **457**

Ambiguous Angles **458**

The Area of a Parallelogram via Trigonometry **460**

The Area of a Polygon **461**

Exercises, Problems, and Worked-out Solutions **462**

6.2 The Law of Sines and the Law of Cosines 468

The Law of Sines **468**

Using the Law of Sines **469**

The Law of Cosines **471**

Using the Law of Cosines **472**

When to Use Which Law **474**

Exercises, Problems, and Worked-out Solutions **475**

6.3 Double-Angle and Half-Angle Formulas 482

The Cosine of 2θ **482**

The Sine of 2θ **483**

The Tangent of 2θ **484**

The Cosine and Sine of $\frac{\theta}{2}$ **485**

The Tangent of $\frac{\theta}{2}$ **487**

Exercises, Problems, and Worked-out Solutions **488**

6.4 Addition and Subtraction Formulas 496

The Cosine of a Sum and Difference **496**

The Sine of a Sum and Difference **498**

The Tangent of a Sum and Difference **499**

Exercises, Problems, and Worked-out Solutions **501**

6.5 Transformations of Trigonometric Functions 506

Amplitude **506**

Period **508**

Phase Shift **511**

Exercises, Problems, and Worked-out Solutions **513**

6.6 Polar Coordinates*	522
Defining Polar Coordinates	522
Converting from Polar to Rectangular Coordinates	523
Converting from Rectangular to Polar Coordinates	524
Graphs of Polar Equations	528
Exercises, Problems, and Worked-out Solutions	530
6.7 Vectors and the Complex Plane*	533
An Algebraic and Geometric Introduction to Vectors	533
The Dot Product	539
The Complex Plane	541
De Moivre's Theorem	545
Exercises, Problems, and Worked-out Solutions	546
Chapter Summary and Chapter Review Questions	550
7 Sequences, Series, and Limits	552
7.1 Sequences	553
Introduction to Sequences	553
Arithmetic Sequences	555
Geometric Sequences	556
Recursive Sequences	558
Exercises, Problems, and Worked-out Solutions	561
7.2 Series	567
Sums of Sequences	567
Arithmetic Series	567
Geometric Series	569
Summation Notation	571
Exercises, Problems, and Worked-out Solutions	572
7.3 Limits	577
Introduction to Limits	577
Infinite Series	581
Decimals as Infinite Series	583
Special Infinite Series	585
Exercises, Problems, and Worked-out Solutions	587
Chapter Summary and Chapter Review Questions	590
Index	593

*Section can be skipped if focusing only on material needed for first-semester calculus.
