*Preface to the Student* xxii

**0** *The Real Numbers* 1

0.1 The Real Line 2

Construction of the Real Line 2

Is Every Real Number Rational? 3

Problems 6

0.2 Algebra of the Real Numbers 7

Commutativity and Associativity 7

The Order of Algebraic Operations 8

The Distributive Property 10

Additive Inverses and Subtraction 11

Multiplicative Inverses and Division 12

Exercises, Problems, and Worked-out Solutions 14

0.3 Inequalities 18

Positive and Negative Numbers 18

Lesser and Greater 19

Intervals 21

Absolute Value 24

Exercises, Problems, and Worked-out Solutions 26

Chapter Summary and Chapter Review Questions 32

<b>1</b>	<b><i>Functions and Their Graphs</i></b>	<b>33</b>
1.1	Functions	34
	Definition and Examples	34
	Equality of Functions	36
	The Domain of a Function	37
	Functions via Tables	38
	The Range of a Function	39
	Exercises, Problems, and Worked-out Solutions	40
1.2	The Coordinate Plane and Graphs	47
	The Coordinate Plane	47
	The Graph of a Function	49
	Determining a Function from Its Graph	51
	Which Sets Are Graphs?	53
	Determining the Range of a Function from Its Graph	53
	Exercises, Problems, and Worked-out Solutions	54
1.3	Function Transformations and Graphs	62
	Shifting a Graph Up or Down	62
	Shifting a Graph Right or Left	63
	Stretching a Graph Vertically or Horizontally	65
	Reflecting a Graph in the Horizontal or Vertical Axis	67
	Even and Odd Functions	69
	Exercises, Problems, and Worked-out Solutions	71
1.4	Composition of Functions	81
	Definition of Composition	81
	Order Matters in Composition	82
	Decomposing Functions	83
	Composing More than Two Functions	84
	Exercises, Problems, and Worked-out Solutions	85
1.5	Inverse Functions	90
	The Inverse Problem	90
	One-to-one Functions	91
	The Definition of an Inverse Function	92
	The Domain and Range of an Inverse Function	94
	The Composition of a Function and Its Inverse	95
	Comments about Notation	97
	Exercises, Problems, and Worked-out Solutions	98

**1.6 A Graphical Approach to Inverse Functions 104**

The Graph of an Inverse Function 104

Inverse Functions via Tables 106

Graphical Interpretation of One-to-One 106

Increasing and Decreasing Functions 108

Exercises, Problems, and Worked-out Solutions 110

Chapter Summary and Chapter Review Questions 115

**2 Linear, Quadratic, Polynomial, and Rational Functions 117**

**2.1 Linear Functions and Lines 118**

Slope 118

The Equation of a Line 119

Parallel Lines 122

Perpendicular Lines 124

Exercises, Problems, and Worked-out Solutions 127

**2.2 Quadratic Functions and Parabolas 135**

The Vertex of a Parabola 135

Completing the Square 137

The Quadratic Formula 140

Exercises, Problems, and Worked-out Solutions 142

**2.3 Integer Exponents 148**

Exponentiation by Positive Integers 148

Properties of Exponentiation 149

Defining  $x^0$  150

Exponentiation by Negative Integers 151

Manipulations with Powers 152

Exercises, Problems, and Worked-out Solutions 154

**2.4 Polynomials 160**

The Degree of a Polynomial 160

The Algebra of Polynomials 162

Zeros and Factorization of Polynomials 163

The Behavior of a Polynomial Near  $\pm\infty$  165

Graphs of Polynomials 168

Exercises, Problems, and Worked-out Solutions 170

2.5	Rational Functions	175
	Ratios of Polynomials	175
	The Algebra of Rational Functions	176
	Division of Polynomials	177
	The Behavior of a Rational Function Near $\pm\infty$	180
	Graphs of Rational Functions	183
	Exercises, Problems, and Worked-out Solutions	184
2.6	Complex Numbers*	190
	The Complex Number System	190
	Arithmetic with Complex Numbers	191
	Complex Conjugates and Division of Complex Numbers	192
	Zeros and Factorization of Polynomials, Revisited	195
	Exercises, Problems, and Worked-out Solutions	199
2.7	Systems of Equations and Matrices*	204
	Solving a System of Equations	204
	Systems of Linear Equations	206
	Matrices and Linear Equations	210
	Exercises, Problems, and Worked-out Solutions	217
	Chapter Summary and Chapter Review Questions	223
<b>3</b>	<b><i>Exponents and Logarithms</i></b>	<b>225</b>
3.1	Rational and Real Exponents	226
	Roots	226
	Rational Exponents	229
	Real Exponents	231
	Exercises, Problems, and Worked-out Solutions	233
3.2	Logarithms as Inverses of Exponentiation	239
	Logarithms Base 2	239
	Logarithms with Arbitrary Base	240
	Change of Base	242
	Exercises, Problems, and Worked-out Solutions	244
3.3	Algebraic Properties of Logarithms	249
	Logarithm of a Product	249
	Logarithm of a Quotient	250

---

\*Section can be skipped if focusing only on material needed for first-semester calculus.

Common Logarithms and the Number of Digits	251
Logarithm of a Power	252
Exercises, Problems, and Worked-out Solutions	253
<b>3.4 Exponential Growth</b>	<b>260</b>
Functions with Exponential Growth	261
Population Growth	263
Compound Interest	265
Exercises, Problems, and Worked-out Solutions	270
<b>3.5 Additional Applications of Exponents and Logarithms</b>	<b>276</b>
Radioactive Decay and Half-Life	276
Earthquakes and the Richter Scale	278
Sound Intensity and Decibels	280
Star Brightness and Apparent Magnitude	281
Exercises, Problems, and Worked-out Solutions	283
Chapter Summary and Chapter Review Questions	289
<b>4 Area, <math>e</math>, and the Natural Logarithm</b>	<b>291</b>
<b>4.1 Distance, Length, and Circles</b>	<b>292</b>
Distance between Two Points	292
Midpoints	293
Distance between a Point and a Line	294
Circles	295
Length	297
Exercises, Problems, and Worked-out Solutions	299
<b>4.2 Areas of Simple Regions</b>	<b>305</b>
Squares	305
Rectangles	306
Parallelograms	306
Triangles	306
Trapezoids	307
Stretching	308
Circles	309
Ellipses	312
Exercises, Problems, and Worked-out Solutions	314
<b>4.3 <math>e</math> and the Natural Logarithm</b>	<b>322</b>
Estimating Area Using Rectangles	322

Defining $e$	324
Defining the Natural Logarithm	327
Properties of the Exponential Function and $\ln$	328
Exercises, Problems, and Worked-out Solutions	330
<b>4.4 Approximations with <math>e</math> and <math>\ln</math></b>	<b>337</b>
Approximations of the Natural Logarithm	337
Inequalities with the Natural Logarithm	338
Approximations with the Exponential Function	339
An Area Formula	340
Exercises, Problems, and Worked-out Solutions	343
<b>4.5 Exponential Growth Revisited</b>	<b>347</b>
Continuously Compounded Interest	347
Continuous Growth Rates	348
Doubling Your Money	349
Exercises, Problems, and Worked-out Solutions	351
Chapter Summary and Chapter Review Questions	356
<b>5 <i>Trigonometric Functions</i></b>	<b>358</b>
<b>5.1 The Unit Circle</b>	<b>359</b>
The Equation of the Unit Circle	359
Angles in the Unit Circle	360
Negative Angles	362
Angles Greater Than $360^\circ$	363
Length of a Circular Arc	364
Special Points on the Unit Circle	365
Exercises, Problems, and Worked-out Solutions	366
<b>5.2 Radians</b>	<b>372</b>
A Natural Unit of Measurement for Angles	372
Negative Angles	375
Angles Greater Than $2\pi$	376
Length of a Circular Arc	377
Area of a Slice	377
Special Points on the Unit Circle	378
Exercises, Problems, and Worked-out Solutions	379
<b>5.3 Cosine and Sine</b>	<b>384</b>
Definition of Cosine and Sine	384

Cosine and Sine of Special Angles	386
The Signs of Cosine and Sine	387
The Key Equation Connecting Cosine and Sine	389
The Graphs of Cosine and Sine	390
Exercises, Problems, and Worked-out Solutions	392
<b>5.4 More Trigonometric Functions</b>	<b>397</b>
Definition of Tangent	397
Tangent of Special Angles	398
The Sign of Tangent	399
Connections between Cosine, Sine, and Tangent	400
The Graph of Tangent	400
Three More Trigonometric Functions	402
Exercises, Problems, and Worked-out Solutions	403
<b>5.5 Trigonometry in Right Triangles</b>	<b>409</b>
Trigonometric Functions via Right Triangles	409
Two Sides of a Right Triangle	411
One Side and One Angle of a Right Triangle	412
Exercises, Problems, and Worked-out Solutions	412
<b>5.6 Trigonometric Identities</b>	<b>419</b>
The Relationship Between Cosine and Sine	419
Trigonometric Identities for the Negative of an Angle	421
Trigonometric Identities with $\frac{\pi}{2}$	422
Trigonometric Identities Involving a Multiple of $\pi$	424
Exercises, Problems, and Worked-out Solutions	428
<b>5.7 Inverse Trigonometric Functions</b>	<b>434</b>
The Arccosine Function	434
The Arcsine Function	437
The Arctangent Function	439
Exercises, Problems, and Worked-out Solutions	442
<b>5.8 Inverse Trigonometric Identities</b>	<b>445</b>
The Arccosine, Arcsine, and Arctangent of $-t$ : Graphical Approach	445
The Arccosine, Arcsine, and Arctangent of $-t$ : Algebraic Approach	447
Arccosine Plus Arcsine	448
The Arctangent of $\frac{1}{t}$	448
Composition of Trigonometric Functions and Their Inverses	449

More Compositions with Inverse Trigonometric Functions	450
Exercises, Problems, and Worked-out Solutions	453

## Chapter Summary and Chapter Review Questions 457

## **6** *Applications of Trigonometry* 459

### 6.1 Using Trigonometry to Compute Area 460

The Area of a Triangle via Trigonometry 460

Ambiguous Angles 461

The Area of a Parallelogram via Trigonometry 463

The Area of a Polygon 464

Exercises, Problems, and Worked-out Solutions 465

### 6.2 The Law of Sines and the Law of Cosines 471

The Law of Sines 471

Using the Law of Sines 472

The Law of Cosines 474

Using the Law of Cosines 475

When to Use Which Law 477

Exercises, Problems, and Worked-out Solutions 478

### 6.3 Double-Angle and Half-Angle Formulas 485

The Cosine of  $2\theta$  485

The Sine of  $2\theta$  486

The Tangent of  $2\theta$  487

The Cosine and Sine of  $\frac{\theta}{2}$  487

The Tangent of  $\frac{\theta}{2}$  490

Exercises, Problems, and Worked-out Solutions 491

### 6.4 Addition and Subtraction Formulas 499

The Cosine of a Sum and Difference 499

The Sine of a Sum and Difference 501

The Tangent of a Sum and Difference 502

Exercises, Problems, and Worked-out Solutions 503

### 6.5 Transformations of Trigonometric Functions 509

Amplitude 509

Period 511

Phase Shift 514

Exercises, Problems, and Worked-out Solutions 516

6.6 Polar Coordinates*	525
Defining Polar Coordinates	525
Converting from Polar to Rectangular Coordinates	526
Converting from Rectangular to Polar Coordinates	527
Graphs of Polar Equations	531
Exercises, Problems, and Worked-out Solutions	533
6.7 Vectors and the Complex Plane*	536
An Algebraic and Geometric Introduction to Vectors	536
The Dot Product	541
The Complex Plane	544
De Moivre's Theorem	548
Exercises, Problems, and Worked-out Solutions	549
Chapter Summary and Chapter Review Questions	553
<b>7 Sequences, Series, and Limits</b>	<b>555</b>
7.1 Sequences	556
Introduction to Sequences	556
Arithmetic Sequences	558
Geometric Sequences	559
Recursive Sequences	561
Exercises, Problems, and Worked-out Solutions	564
7.2 Series	570
Sums of Sequences	570
Arithmetic Series	570
Geometric Series	572
Summation Notation	574
Exercises, Problems, and Worked-out Solutions	575
7.3 Limits	580
Introduction to Limits	580
Infinite Series	584
Decimals as Infinite Series	586
Special Infinite Series	588
Exercises, Problems, and Worked-out Solutions	590
Chapter Summary and Chapter Review Questions	593
<b><i>Index</i></b>	<b>594</b>
